SIDHARTH KUMAR SHARMA

Kolkata, West Bengal | 9836417005 | rs9768401@gmail.com | linkedin.com/in/sidharth-sharma205 | github.com/sidharth205

Summary

Computer Science undergraduate with strong fundamentals in data structures, algorithms, and OOP, and hands-on experience building backend systems, REST APIs, and full-stack applications. Led a 6-member team shipping a FastAPI + Flutter app, architected multi-service backends (graph, vector, relational databases) at a startup, and built a JWT-secured, role-based Node.js platform. Seeking **SDE / Backend Engineering** roles.

Experience

Backend Engineering Intern **Jul 2024 – Oct 2025**
Azmth (Startup, Remote)

- Architected a multi-service backend with the Groq API, defining service boundaries across a graph-database layer (Neo4j), a real-time conversation service, and a stateful personality/memory service, and coordinating data flow between them.
- Designed a data pipeline combining vector search (ChromaDB, OpenAI embeddings) with Neo4j for persistent, queryable user context; progressed to senior developer within a 5-member team.
- Built and deployed a production backend service for an external client with persistent per-user session storage; feedback praised response precision, near-zero hallucination, and accurate session-context retention. Added OCR-based source attribution tracing outputs to the referenced image in a source PDF.

Full-Stack Developer Intern **Jun 2026 – Aug 2026**
EssProm Academy

- Built the Admin module end-to-end (frontend + backend) of a multi-user Resource/Project Management System in Node.js/Express and Supabase, with custom REST APIs.
- Designed role-based access control and implemented JWT/Supabase authentication middleware alongside the shared Manager module, securing a system that handles real user data.

Projects

Civic Issue Reporting App (Smart India Hackathon 2025) | *FastAPI, Flutter, Supabase/PostgreSQL, REST APIs* **2025**

- Led a 6-member team as Team Lead; architected a FastAPI backend with ∼10 REST endpoints and full CRUD operations on a Supabase (PostgreSQL) database, integrated with a Flutter frontend via Ngrok-exposed APIs for near real-time, end-to-end functionality.

EssProm Resource Management System | *Node.js, Express, Supabase, JWT* **Jun – Aug 2026**

- Built a project/task platform with Employee and Admin interfaces for assigning tasks, tracking progress, and collecting timesheets; owned business rules, RBAC, and centralized reporting.

Sign Language Interpreter Glove | *ESP32, Python, TensorFlow, IoT* **2025 – Present**

- Built an IoT glove that captures sensor data via ESP32, cleans noisy streams, and classifies 12 gestures with a neural network (97% accuracy), converting them to speech in 0.2–0.7s.

AI-Powered Library Management System | *Flask, PHP, MySQL, LangChain, NLP* **2024**

- Built a web platform with an LLM-powered chatbot and NLP-based recommendation engine using borrowing history, reducing manual query load.

Technical Skills

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), REST API Design, Schema Design
Languages: Python, Java, C++, C, SQL
Backend & Frameworks: FastAPI, Flask, Node.js/Express, REST APIs, JWT/RBAC Auth, NumPy, Pandas
Databases: PostgreSQL, MySQL, MongoDB, Neo4j (Graph), ChromaDB (Vector), Supabase
Data & Streaming: Apache Kafka (coursework), ETL/Data Pipeline Design, Data Cleaning
Tools & Platforms: Git, GitHub, Docker, Linux, VS Code, Ngrok, Claude, ChatGPT, GitHub Copilot
AI/ML & IoT: Multi-Agent Systems, RAG, LangChain, LLMs, Prompt Engineering, TensorFlow, NLTK, OpenCV, OCR, ESP32, Arduino

Education

B.Tech – Computer Science & Engineering, Adamas University, Barasat **2023 – 2027**
CGPA: 8.42/10
Java & SQL Training Program, QSpider **2026**
Class XII (ISC): 73% | **Class X (ICSE):** 80% | Mahavir Institute of Education and Research, Kolkata

Certifications & Achievements

HackerRank: 4-star Java, 5-star C++ (Aug 2026) | **Coursera:** Java Language & Java as a Second Language (Mar 2025) | **Great Learning:** C Programming (Nov 2023)
